

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A protective media, including:
a porous dielectric carrier;
an active agent incorporated in said porous dielectric carrier, said active agent being an iodinated resin; and
an electrostatic charge across at least a portion of said porous dielectric carrier, wherein said porous dielectric carrier is a non-woven material.
2. (Canceled)
3. (Original) The protective media of claim 1 in which said porous dielectric carrier is a fiber based material having a fibrous matrix structure.
4. (Previously Presented) The protective media of claim 1 in which said porous dielectric carrier is a sponge like material have an open cell matrix structure, wherein the open cell matrix structure is a foam.
5. (Currently Amended) The protective media of claim 12 in which said non-woven material is a three dimensional structure configured to provide a matrix capable of physically entrapping said active agent.
6. (Previously Presented) The protective media of claim 5 in which said active agent is configured to be physically entrapped in said matrix.

7-24. (Canceled)

25. (Currently Amended) A protective media, including:
a first porous dielectric carrier;
a first active agent incorporated in said first porous dielectric carrier, said first active agent being an iodinated resin;
an electrostatic charge across at least a portion of said first porous dielectric carrier;
a second porous dielectric carrier;
a second active agent incorporated in said second porous dielectric carrier; and
an electrostatic charge across at least a portion of said second porous dielectric carrier, wherein each of said first porous dielectric carrier and said second porous dielectric carrier is a non-woven material.

26. (Original) The protective media of claim 25 in which said first active agent and said second active agent are of the same material.

27. (Original) The protective media of claim 25 in which an air gap separates said first and said second porous dielectric carriers.

28. (Canceled)

29. (Original) The protective media of claim 27 in which said porous dielectric carrier is a fiber based material having a fibrous matrix structure.

30. (Original) The protective media of claim 27 in which said porous dielectric carrier is a sponge like material have an open cell matrix structure.

31. (Original) The protective media of claim 29 in which said non-woven material is a three dimensional structure configured to provide a matrix capable of physically entrapping said active agent.

32. (Previously Presented) The protective media of claim 31 in which said active agent consists of particles configured to be physically entrapped in said matrix.

33-40. (Canceled)

41. (New) The protective media of claim 1 in which said porous dielectric carrier comprises polymer fiber.

42. (New) The protective media of claim 41 in which said polymer fiber comprises polypropylene.

43 (New) The protective media of claim 41 in which said polymer fiber comprises a member selected from the group consisting of nylon, polyethylene, and polyester.
